

codegarden

The Official Umbraco Conference

**If Umbraco is important to your business,
attending Codegarden is a great investment.
Why exactly?**

We give you 8 good reasons

1 Your employee will come home with 1 (or 10!) great new ideas!

The Codegarden conference is more than just a nice fresh breeze of new ideas - It's a storm!

We work hard to ensure that the conference provides a wide variety of sessions and activities so everyone from beginners to seasoned Umbraco veterans, developers, project managers, CTOs, CEOs etc. - all leave filled with new knowledge, motivation and fresh ideas.

Ideas that they can use as soon as they get back to the office.

2 No time-waste. This is where you find the worldclass of everything Umbraco.

With 3 tracks packed from morning till evening, there will always be something interesting and meaningful to participate in.

The people behind some of the most advanced and ambitious Umbraco implementations in the world will be presenting at Codegarden 2020 along with acclaimed web/CMS keynote speakers.

There is no better place to send your employee if you want them to be completely up to date with the newest things in the Umbraco-sphere.

3 Codegarden is **THE** place for professional Umbraco networking.

While the tracks are jam-packed, we also provide space for attendees to talk and share knowledge with each other as we know that this is highly inspiring and motivating. Codegarden is the biggest concentration of Umbraco talent - fact! It is the perfect opportunity to network and gain new professional contacts and friends from all over the world. There's a big chance that your employee will bump into someone who works in a similar business as yours and thus, are able to discuss concrete challenges, issues and solutions.

4 Give your employee a motivational drive that's out of this world!

Now, that's a big promise. But we will deliver.

We think this should actually be one of the biggest reasons for sending your employees to this event - they do great work for you everyday, they deserve a kick of inspiration and motivation that'll make their work with Umbraco even more enjoyable! And a one-of-a-kind conference experience that'll have them buzzing for months to follow.

Just wait until you see that inspirational sparkle in their eyes when they return from Codegarden 2020 with a long list of new ideas for upcoming projects... you'll be encouraging them to go back for Codegarden 2021!

5 Have your say and influence the future of Umbraco.

Have you or your developers got ideas to how Umbraco should be improved? Perhaps you keep running into an annoying issue that you just want fixed?

At the Open Space session at Codegarden you can bring your ideas and thoughts up and together with other passionate and talented Umbraco developers you can discuss concrete action points that you'd like to change or improve in Umbraco to make your everyday work with the CMS simpler and less time consuming.

6 Your employee gets a chance to talk directly to the people behind Umbraco.

Directly, as in face-to-face. The entire team behind Umbraco will be present and ready for questions, including the founder of Umbraco: Niels Hartvig, and the rest of Umbraco HQ. We're friendly and we really want to hear your ideas and thoughts on Umbraco.

7 It's much cheaper than most 3-day conferences.

We know that for most of you, transportation and hospitality needs to be added to the ticket price. This is one of the reasons why we keep the actual Codegarden ticket price low.

A ticket includes 3 full conference days packed with everything Umbraco, delicious lunch and dinner, memorable social/networking activities and all the coffee needed.

8 Everyone is going - can you really afford to miss out?

Attendees at Codegarden gain a competitive edge. As mentioned above, Codegarden is where you find the biggest concentration of Umbraco talent, the entire Umbraco HQ and acclaimed CMS/web experts. All of whom are at Codegarden to share their latest knowledge and best practise in Umbraco.

Keeping your employees skills up to date, you can make sure your business takes full advantage of the newest Umbraco tech and stay ahead of your competitors. Can you really afford skipping this once-a-year Umbraco extravaganza, missing out on all the latest within Umbraco and sneak peeks of what's coming?

Last year over 700 people from more than 200 different businesses from around the world took part in Codegarden.

Shouldn't your company also take part in all of this too?

We look forward to welcoming you!
